

Challenging times for Vale School Pupils

Pupils from Vale of Evesham School took part on the exciting STEM QinetiQ Robotics Challenge Competition organised by STEM-works in conjunction with QinetiQ.

QinetiQ has expertise in science, engineering and robotics which allows them to produce solutions to the world's most challenging problems. In this exciting and engaging interschool challenge, students were introduced to the fascinating world of robots. They were given the opportunity to construct their own robot, and be taught the necessary programming skills. Students then competed in a series of increasingly difficult challenges testing their teamwork, communication skills and resilience.

The winners of the challenge, Jack Price and Jack Birch have been chosen to represent the Vale of Evesham School at the final of the QinetiQ, Malvern Technology Centre, this month.

Headteacher Stephen Garside said: "This is a fantastic opportunity for our young people to explore their creative and technical abilities".
